JUSTIFICATION

This mission is in response to the USIB requirement for high resolution photographic coverage of COMIREX priority targets in North Vietnam. Specifically, the OXCART aircraft is to cover those areas of North Vietnam which, because of surface-to-air missile defenses, cannot be covered adequately by other means. The 303 Committee has approved a bank of nine BLACK SHIELD missions per month.

VULNERABILITY ESTIMATE

There are 249 surface-to-air missile launch positions that have been detected in North Vietnam; of this number, 216 are known to be capable of supporting surface-to-air operations; however, there are only 28 to 30 SAM battalions estimated to be active on any certain day.
